1.2 STUDENT ACADEMIC ACHIEVEMENT AND PARTICIPATION IN STATE ASSESSMENTS

This section collects data on student academic achievement and participation in the State assessments.

Note: States are not required to report these data by the racial/ethnic groups shown in the table below; instead, they are required to report these data by the major racial and ethnic groups that align with their accountability system.

1.2.1 Academic Achievement and Participation in Mathematics Assessment

In the table below, provide information on the achievement and participation of students on the mathematics assessments required under Section 1111(b)(2) of the *ESEA* by reporting on: the number of students enrolled during the State's testing window, the number of students who participated in the mathematics assessment, the number of students who took the mathematics assessment and received a valid score, and the number of students who scored at or above proficient. The percentage of students who participated in the assessment and the percentage of students scoring at or above proficient will be calculated automatically.

The student group "children with disabilities (*IDEA*)" includes children with disabilities, as defined under the *Individuals with Disabilities Education Act* (*IDEA*), who participated in the regular assessments with or without accommodations and alternate assessments. Do not include former children with disabilities (*IDEA*). Do not include students only covered under Section 504 of the *Rehabilitation Act of 1973*.

The student group "English learners" should include recently arrived students who are identified as English Learners (ELs) and who have attended schools in the U.S. for less than 12 months. Do not include former ELs (i.e., those who exited EL status prior to the testing window within the past four years).

This table is repeated for each of grades three through eight and once for high school.

1.2.2 Academic Achievement and Participation in Reading/Language Arts Assessment

In the table below, provide information on the achievement and participation of students on the reading/language arts assessments required under Section 1111(b)(2) of the *ESEA* by reporting on: the number of students enrolled during the State's testing window, the number of students who participated in the reading/language arts assessment, the number of students who took the reading/language arts assessment and received a valid score, and the number of students who scored at or above proficient. The percentage of students who were tested and the percentage of students scoring at or above proficient will be calculated automatically.

Do not include former children with disabilities (*IDEA*). Do not include students only covered under Section 504 of the *Rehabilitation Act of 1973*.

The student group "English learners" does not include recently arrived students who have attended schools in the United States for fewer than 12 months and who took an assessment of English language proficiency (ELP) in lieu of the State's reading/language arts assessment. Do not include former ELs.

This table is repeated for each of grades three through eight and once for high school.

1.3 TEACHERS

In the tables below, provide the number of teachers for each of the school types listed and the number of teachers who are inexperienced, emergency or provisional credentialed, or out of field. The percentages used for high- and low-poverty schools and the poverty metric used to determine those percentages are reported in the second table. Below the tables are FAQs about these data.

1.3.1 Inexperienced Teachers

In the table below, provide information on the experience of teachers by poverty quartile and level.

Total schools	46,997.00	2,986.21	

Comments: The response is limited to 4,000 characters.

1.3.4 Poverty Quartile Breaks

In the table below, provide the poverty quartiles breaks used in determining high- and low-poverty schools and the poverty metric used to determine the poverty quartiles.

	High-Poverty Schools (more than what %)	Low-Poverty Schools (less than what %)
All schools	69.12%	41.31%

Poverty metric used	"Alabama's poverty quartile calculation categorizes any school with a poverty percentage greater than or equal to 69.12% in the high poverty quartile. Alabama's poverty quartile calculation categorizes any school with a poverty percentage less than or equal to 41.31% in the low poverty quartile. Alabama calculates the Free/Reduced Percentage for each school using Fall Extract data. Once the percentages are calculated (carried to two decimal places) the schools are ranked by Free/Reduced percentage and divided into quartiles. Schools in quartile 1 are labeled as low poverty while schools in quartile 4 are labeled as high poverty."
---------------------	---

FAQ:

How are the poverty quartiles determined? Rank order all schools from highest to lowest on your percentage poverty measure. Divide the list into four equal groups. Schools in the first (highest group) are high-poverty schools. Schools in the last group (lowest group) are the low-poverty schools. Generally, States use the percentage of students who qualify for the free or reduced-price lunch program for this calculation.
