1.2 STUDENT ACADEMIC ACHIEVEMENT AND PARTICIPATION IN STATE ASSESSMENTS

This section collects data on student academic achievement and participation in the State assessments.

Note: States are not required to report these data by the racial/ethnic groups shown in the table below; instead, they are required to report these data by the major racial and ethnic groups that align with their accountability system.

1.2.1 Academic Achievement and Participation in Mathematics Assessment

In the table below, provide information on the achievement and participation of students on the mathematics assessments required under Section 1111(b)(2) of the *ESEA* by reporting on: the number of students enrolled during the State's testing window, the number of students who participated in the mathematics assessment, the number of students who took the mathematics assessment and received a valid score, and the number of students who scored at or above proficient. The percentage of students who participated in the assessment and the percentage of students scoring at or above proficient will be calculated automatically.

The student group "children with disabilities (*IDEA*)" includes children with disabilities, as defined under the *Individuals with Disabilities Education Act* (*IDEA*), who participated in the regular assessments with or without accommodations and alternate assessments. Do not include former children with disabilities (*IDEA*). Do not include students only covered under Section 504 of the *Rehabilitation Act of 1973*.

The student group "English learners" should include recently arrived students who are identified as English Learners (ELs) and who have attended schools in the U.S. for less than 12 months. Do not include former ELs (i.e., those who exited EL status prior to the testing window within the past four years).

This table is repeated for each of grades three through eight and once for high school.

1.2.2 Academic Achievement and Participation in Reading/Language Arts Assessment

In the table below, provide information on the achievement and participation of students on the reading/language arts assessments required under Section 1111(b)(2) of the *ESEA* by reporting on: the number of students enrolled during the State's testing window, the number of students who participated in the reading/language arts assessment, the number of students who took the reading/language arts assessment and received a valid score, and the number of students who scored at or above proficient. The percentage of students who were tested and the percentage of students scoring at or above proficient will be calculated automatically.

The student group "children with disabilities (*IDEA*)" includes children who participated in the regular assessments with or without accommodations and alternate assessments. Do not include former children with disabilities (*IDEA*). Do not include students only covered under Section 504 of the *Rehabilitation Act of 1973*.

The student group "English learners" does not include recently arrived students who have attended schools in the United States for fewer than 12 months and who took an assessment of English language proficiency (ELP) in lieu of the State's reading/language arts assessment. Do not include former ELs.

This table is repeated for each of grades three through eight and once for high school.

In the table below, provide information on the achievement and participation of students on the science assessments required under Section 1111(b)(2) of the *ESEA* by reporting on: the number of students enrolled during the State's testing window, the number of students who participated in the science assessment, the number of students who took the science assessment and received a valid score, and the number of students who scored at or above proficient. The percentage of students who were tested and the percentage of students scoring at or above proficient will be calculated automatically.

This table is repeated for each of grades three through eight and once for high school.

1.2.4 Assessment Participation by Assessment Type for Children with Disabilities

This section collects information on children with disabilities' participation in the mathematics, reading/language arts, and science assessments.

1.2.4.1 Participation of Children with Disabilities (IDEA) in Mathematics Assessment

In the table below, provide the number of children with disabilities (*IDEA*) participating during the State's testing window in mathematics assessments required under Section 1111(b)(2) of the *ESEA* by the type of assessment. The percentage of children with disabilities (*IDEA*) who participated in the mathematics assessment for each assessment option will be calculated automatically. The total number of children with disabilities (*IDEA*) participating will also be calculated automatically.

The data provided below should include mathematics participation data from all children with disabilities (*IDEA*) as defined under the *IDEA*. Do not include students only covered under Section 504 of the *Rehabilitation Act of 1973*.

Type of Assessment	# Children with Disabilities (<i>IDEA</i>) Participating	Percentage of Children with Disabilities (<i>IDEA</i>) Participating, Who Took the Specified Assessment
Regular Assessment without Accommodations	4,164	9.23%
Regular Assessment with Accommodations	35,122	77.83%
Alternate Assessment Based on Alternate Achievement Standards	5,841	12.94%

All schools	75.59%	46.35%

Poverty metric used	economically disadvantaged
---------------------	----------------------------

FAQ:

How are the poverty quartiles determined? Rank order all schools from highest to lowest on your percentage poverty measure. Divide the list into four equal groups. Schools in the first (highest group) are high-poverty schools. Schools in the last group (lowest group) are the low-poverty schools. Generally, States use the percentage of students who qualify for the free or reduced-price lunch program for this calculation.
