FAQ:How are the poverty quartiles determined?

Rank order all schools from highest to lowest on your percentage poverty measure. Divide the list into four equal groups. Schools in the first (highest group) are high-poverty schools. Schools in the last group (lowest group) are the low-poverty schools. Generally, States use the percentage of students who qualify for the free or reduced-price lunch program for this calculation.

Data Quality Comment
Highest poverty groups ranged from 69.90 percent and above. Lowest poverty groups ranged from 47.84 percent and below.

In the comment box below, describe how your State can shorten the process of distributing Title III funds to subgrantees.

State	Comments
KENTUCKY	The SEA receives the state allocation which is then directly input into our grant formula worksheet. The SEA has an intent to participate that opens to allow districts to review their tentative allocation and determine if they would like to operate a standalone program, join a consortium or decline funds. That intent to participate is open for 2 weeks in the spring prior to the upcoming school year. Once the intent closes, then the LEAs who receive funds are required to complete an application in the Grant Management Application Program (GMAP). The applications are reviewed and approved by SEA, then the districts funds are released. Final allocations are uploaded into GMAP the following fall and revisions to the district program plans are required.
