### 1.3.4 Poverty Quartile Breaks

In the table below, provide the poverty quartiles breaks used in determining high- and low-poverty schools and the poverty metric used to determine the poverty quartiles.

High-Poverty Schools (More than what %)	Low-Poverty Schools (Less than what %)	Poverty Metric Used
76	39	Poverty Percentage based on Title I data; NC uses the NTile aggregation function in OBIEE to calculate the 4 quartiles. The NTile function takes the Poverty Percentage of each school and divides the schools into 4 groups by poverty percentage. Schools in Group 1, the lowest poverty percentage levels, are flagged as "Low"; the schools in Group 4, the highest poverty percentage levels, are flagged as "High". The remainder are flagged as "Neither" high nor low group.

### FAQ:How are the poverty quartiles determined?

Rank order all schools from highest to lowest on your percentage poverty measure. Divide the list into four equal groups. Schools in the first (highest group) are high-poverty schools. Schools in the last group (lowest group) are the low-poverty schools. Generally, States use the percentage of students who qualify for the free or reduced-price lunch program for this calculation.
