In the table below, provide the poverty quartiles breaks used in determining high- and low-poverty schools and the poverty metric used to determine the poverty quartiles.

High-Poverty Schools (More than what %)	Low-Poverty Schools (Less than what %)	Poverty Metric Used
48	22	Since 2015-16, TN has defined economically disadvantaged students as students directly certified for participation in the National School Lunch Program (NSLP) via participation in federal/state income and nutrition programs (e.g., SNAP, TANF), as well as students categorically eligible for participation in NSLP (i.e., homeless, migrant, runaway, and foster care students).

FAQ:How are the poverty quartiles determined?

Rank order all schools from highest to lowest on your percentage poverty measure. Divide the list into four equal groups. Schools in the first (highest group) are high-poverty schools. Schools in the last group (lowest group) are the low-poverty schools. Generally, States use the percentage of students who qualify for the free or reduced-price lunch program for this calculation.
