1.1 GENERAL INFORMATION

This section collects data on State's Annual State Report Card required under Section 1111(h)(1)(A) of the ESEA.

1.1.1 State Report Cards

1.2 STUDENT ACADEMIC ACHIEVEMENT AND PARTICIPATION IN STATE ASSESSMENTS

This section collects data on student academic achievement and participation in the State assessments.

Note: States are not required to report these data by the racial/ethnic groups shown in the table below; instead, they are required to report these data by the major racial and ethnic groups that align with their accountability system.

1.2.1 Academic Achievement and Participation in Mathematics Assessment

In the table below, provide information on the achievement and participation of students on the mathematics assessments required under Section 1111(b)(2) of the ESEA by reporting on the number of students enrolled during the State's testing window, the number of students who participated in the mathematics assessment, the number of students who took the mathematics assessment and received a valid score, and the number of students who scored at or above proficient. The percentage of students who participated in the assessment and the percentage of students scoring at or above proficient will be calculated automatically.

The student group "children with disabilities (IDEA)" includes children with disabilities, as defined under the Individuals with Disabilities Education Act (IDEA), who participated in the regular assessments with or without accommodations and alternate assessments. Do not include former children with disabilities (IDEA). Do not include students only covered under Section 504 of the Rehabilitation Act of 1973.

The student group "English learners" should include recently arrived students who are identified as English Learners (ELs) and who have attended schools in the U.S. for less than 12 months. Do not include former ELs (i.e., those who exited EL status prior to the testing window within the past four years).

This table is repeated for each of grades three through eight and once for high school.

Populated with SEA-LEVEL FS175/DG583 and FS185/DG588.

FAQ:How are the poverty quartiles determined?

Rank order all schools from highest to lowest on your percentage poverty measure. Divide the list into four equal groups. Schools in the first (highest group) are high-poverty schools. Schools in the last group (lowest group) are the low-poverty schools. Generally, States use the percentage of students who qualify for the free or reduced-price lunch program for this calculation.

1.7 EDUCATION OF MIGRATORY CHILDREN

This section collects data on the Migrant Education Program (MEP) (Title I, Part C) for the performance period of September 1, 2021 through August 31, 2022. This section is composed of the following subsections:

- Population data of eligible migratory children
- Academic data of eligible migratory students
- Data of migratory children served during the performance period
- School data
- Project data
- Personnel data

Report a child in the age/grade category in which the child spent the majority of their time while residing in the State during the performance period.

There are two exceptions to this rule:

1. A child who turns 3 during the performance period is reported as 'Age 3 through 5 (not Kindergarten)' only if the child's residency in the state was verified after the child turned three.
2. A child who turns 22 years of age during the performance is reported at the appropriate age/grade category for the performance period.

1.7.1 Migratory Child Counts

This section collects the Title I, Part C, MEP child counts which States are required to provide and may be used to determine the annual State allocations under Title I, Part C. The child counts should reflect the performance period of September 1, 2021 through August 31, 2022. This section also collects a report on the procedures used by States to produce true, reliable, and valid child counts.

To provide the child counts, each State Education Agency (SEA) should have implemented sufficient procedures and internal controls to ensure that it is counting only those children who are eligible for the MEP. Such procedures are important to protecting the integrity of the State's MEP because they permit the early discovery and correction of eligibility problems and thus help to ensure that only eligible migratory children are counted for funding purposes and are served. If an SEA has reservations about the accuracy of its child counts, it must disclose known data limitations to the Department, and explain how and when it will resolve data quality issues through corrective actions in the box below, which precedes Section 1.7.1.1 Category 1 Child Count.

Note: In submitting this information, the Authorizing State Official must certify that, to the best of his/her knowledge, the State has taken action to ensure that the child counts and information contained in the report are true, reliable, and valid and that any false statement provided is subject to fine or imprisonment pursuant to 18 U.S.C. 1001.

FAQs on Child Count:

- a. How is 'out-of-school' defined? Out-of-school means children up through age 21 who are entitled to a free public education in the State but are not currently enrolled in a K-12 institution. This term could include students who have dropped out of school, youth who are working on a high school equivalency diploma (HSED) outside of a K-12 institution, and youth who are 'here-to-work' only. It would not include children in preschool, nor does it include temporary absences (e.g., summer/intersession, suspension or illness). Enrollment in school is not a condition affecting eligibility for the MEP. Therefore, out-of-school youth who meet the definition of a 'migratory child' are eligible for the MEP.
- b. How is 'ungraded' defined? Ungraded means the children are served in an educational unit that has no separate grades. For example, some schools have primary grade groupings that are not traditionally graded or ungraded groupings for children with learning disabilities (IDEA). In some cases, ungraded students may also include special education children (IDEA), transitional bilingual students, students working on a HSED through a K-12 institution, or those in a correctional setting. (Do not count students working on a HSED outside of a K-12 institution as ungraded; these students are counted as out-of-school youth.)
- c. How is reporting 'a child in the age/grade category in which s/he spent the majority of his/her time while residing in the State' defined? A State must report a child in only one age/grade category in which the child spent the majority of his/her time while residing in the State. For example, a migratory child resided in State A for three months and in State B for nine months in SY2021-22. While in State A, the child enrolled in ninth grade for two months and in tenth grade for one month. Therefore, State A will report the child in the age/grade category of ninth grade, because the child spent the majority of his/her time in ninth grade in State A. In State B, the child enrolled in eighth grade for one month and in ninth grade for eight months. Therefore, State B will report the child in the age/grade category of ninth grade, because the child spent the majority of his/her time in ninth grade in State B.

In the space below, discuss any concerns about the accuracy of the reported child counts or the underlying eligibility determinations on which the counts are based and how and when these concerns will be resolved.

1.7.1.1 Category 1 Child Count (Eligible Migratory Children)

This figure includes all eligible migratory children who may or may not have received MEP services. Count a child who moved from one age/grade level to another during the performance period only once in the age/grade category in which s/he spent the majority of his/her time while residing in the State, during the performance period. The unduplicated statewide total count is calculated automatically.

Count a child who moved from one age/grade level to another during the performance period only once in the age/grade category in which s/he spent the majority of his/her time while residing in the State, during the performance period. Count a child who moved to different schools within the State and who was served in both traditional summer and year-round school intersession programs only once. 1.7.3 Child Count Calculation and Validation Procedures

The following questions request information on the State's MEP child count calculation and validation procedures.

1.7.3.1 Methods Used to Count Children

In the space below, please describe the procedures and processes at the State level used to ensure all eligible children, ages 3-21 are reported. In particular, describe how the State includes and counts only:

- The unduplicated count of eligible migratory children, ages 3-21. Only include children two years of age whose residency in the state has been verified after turning three.
- Children who met the program eligibility criteria (e.g., were within 3 years of a qualifying move, engaged or had parents engage in migratory agricultural or fishing work, and were entitled to a free public education through grade 12 in the State, or preschool children below the age and grade level at which the agency provides free public education). Children who were resident in your State for at least 1 day during the performance period (September 1 through August 31).
- Children who graduated from high school or attained a High School Equivalency Diploma (HSED) during the performance period and ensures that these children are not counted in the subsequent performance period's child count.
- Children who in the case of Category 2 were served for one or more days in a MEP-funded project conducted during either the summer term or during intersession periods.
- Children once per age/grade level for each child count category.
- Children who had an SEA approved Certificate of Eligibility (COE) and were entered in the State's migratory student database.

Does the State ensure that the system that transmits migrant data to the Department accurately accounts for all the migratory children in every EDFacts data file? Please respond in the table below.

If MSIX is utilized, please explain how.

1.7.3.2 Quality Control Processes

In the space below, describe the results of any re-interview processes used by the SEA during the performance period to test the accuracy of the State's MEP eligibility determinations.

FAQ on independent prospective re-interviews:

a. What are independent prospective re-interviews? Independent prospective re-interviews allow confirmation of your State's eligibility determinations and the accuracy of the numbers of migratory children in your State reports. Independent prospective interviews should be conducted at least once every three years by an independent interviewer, performed on the current year's identified migratory children.

If you did conduct independent re-interviews in this reporting period, describe how you ensured that the process was independent. Only enter a response if your State completed independent re-interviews in SY2021-22.

In the space below, refer to the results of any re-interview processes used by the SEA, and if any of the migratory children were found ineligible, describe those corrective actions or improvements that will be made by the SEA to improve the accuracy of its MEP eligibility determinations.

In the space below, please respond to the following question:

1.7.6 MEP Services - During the Performance Period

The following questions collect data about MEP services provided to migratory children during the performance period.

FAQ on Services:

What are services? Services are a subset of all allowable activities that the MEP can provide through its programs and projects. 'Services' are those educational or educationally related activities that: (1) directly benefit a migratory child; (2) address a need of a migratory child consistent with the SEA's comprehensive needs assessment and service delivery plan; (3) are grounded in scientifically based research or, in the case of support services, are a generally accepted practice; and (4) are designed to enable the program to meet its measurable outcomes and contribute to the achievement of the State's performance targets/annual measurable objectives. Activities related to identification and recruitment activities, parental involvement, program evaluation, professional development, or administration of the program are examples of allowable activities that are not considered services. Other examples of an allowable activity that would not be considered a service would be the one-time act of providing instructional packets to a child or family, and handing out leaflets to migratory families on available reading programs as part of an effort to increase the reading skills of migratory children. Although these are allowable activities, they are not services because they do not meet all of the criteria above.

In the table below, provide the unduplicated number of eligible migratory children who received MEP-funded instructional or support services at any time during the performance period. Do not count the number of times an individual child received a service intervention. The total number of students served is calculated automatically.

FAQ on Continuation of Services:

What is Continuation of Services? The 'continuation of services' provision found in Section 1304(e) of the ESEA provides that: (1) a child who ceases to be a migratory child during a school term shall be eligible for services until the end of such term; (2) a child who is no longer a migratory child may continue to receive services for one additional school year, but only if comparable services are not available through other programs; and (3) secondary school students who were eligible for services in secondary school may continue to be served through credit accrual programs until graduation.
